

Cable & Wireless (Barbados) Deploys Calix Solutions to Expand Network, Add New Services

Expansion Enables Greatly Increased DSL and VOIP Capability

JUNE 27, 2007, PETALUMA, CA—Calix today announced that Cable & Wireless (Barbados) Limited has chosen the Calix C7 multiservice access platform (MSAP) and the Calix Management System (CMS) to implement a 24,000-line expansion of its existing network that will bring DSL and VOIP services to more customers. Cable & Wireless (Barbados) had previously installed more than 10,000 Calix combo ports for POTS and ADSL2+ service. The provider brings cutting-edge technology to the residents of Barbados with services ranging from basic telephone service and internet access to managed data network solutions and cellular services.

“Cable & Wireless (Barbados) selected Calix not only because its solutions enable us to bring more customers into our network but also because it provides us with a cost-effective way of greatly increasing our DSL and VOIP capability,” said Ed Layne, Vice President Networks, Cable & Wireless (Barbados). “Our market is competitive, and with the Calix C7 we are able to maintain and increase our competitive advantage as we move to an IP-based network.”

The Calix C7 allows Cable & Wireless (Barbados) to upgrade to an advanced, IP-based access network that will meet the needs of its residential and business customers now and well into the future and to deploy new IP-based services. The CMS advanced management and provisioning platform makes it easier for the operator to offer VOIP and other IP services as well as to leverage IP Multimedia Subsystem (IMS) applications as they become available. In addition, the advanced troubleshooting and fault correction of the CMS enable Cable & Wireless (Barbados) to provide exception service availability to its subscribers.

“Calix is a major force in the Caribbean, and our relationship with Cable & Wireless (Barbados) is instrumental in helping further increase our presence. Four of the largest service providers in the Caribbean now depend on Calix to deliver a broad array of advanced services to their customers,” said Mark Dressler, director of sales, CALA region, for Calix. “A technically sophisticated and aggressive provider, Cable & Wireless (Barbados) is a rising star in the Caribbean, and we look forward to working with the company over the long term.”

About Calix

Calix is the largest telecom equipment supplier focused solely on access solutions for broadband service delivery. Service providers deploy Calix access systems to enable a rich set of information, communication, and entertainment services and to expand their revenue base beyond connectivity. Calix access innovation helps service providers transform their networks from circuit to packet, narrowband to broadband, and copper to fiber. Calix has deployed millions of ports and tens of

thousands of systems into hundreds of service provider networks throughout North America. For more information, visit the Calix website at www.calix.com.
