

Exam Description

This certification focuses on building and maintaining C7 Networks. Candidates are tested in various aspects of network maintenance including network turn-up, configuring Ethernet links and ERPS, configuring SONET transport, configuring GR-303 voice services, and network backup and restore operations.

Passing Score: 70%

Time Limit: 90 minutes

Renewal Required: None

Certification Readiness:

Before attempting certification, you should have extensive experience using the C7 and CMS to configure and manage C7 networks. Calix also offers training courses that can help you prepare for certification.

Delivery Mode

Certification exams are delivered online through Calix Academy. Once the test is started, it must be completed in a single session. The test may not be suspended and resumed at a later time. If you exit the browser, the test is submitted and scored. If you do not pass, you will be provided immediate feedback on the areas that require further study. You are allowed one re-test. If you do not pass on the second attempt, you must re-register and pay for the test again.
