

Course Description

Learn the essential skills and procedures you need to deploy GPON services using the Calix B6 Ethernet Services Access Node. In this class you will learn how to provision voice, video, and data services for B6 GPON subscribers.

Objectives

- Describe the basics of a GPON network
- Describe the B6 GPON hardware components
- Provision and manage B6 GPON ONTs
- Provision and activate B6 GPON TDM, MGCP and SIP voice services
- Provision and activate B6 GPON Data services
- Provision and activate B6 GPON Video services

Who should attend?

- Technicians who manage, maintain, troubleshoot and configure the B6.
- Technicians who configure B6 GPON subscriber services

Prerequisite Training and Skills

- Completion of B6 Platform Overview online class or equivalent knowledge
- Completion of Configuring B6 Ethernet Transport online class or equivalent knowledge
