

## Course Description

This course provides a basic overview of the Calix B6 Ethernet Services Access Platform. It includes a platform overview, services and applications overview, Ethernet features, system setup, and management

### Objectives

- Describe the B6 hardware platforms.
- Recognize the ideal network for the B6.
- Understand how the B6 delivers services.
- Understand the technologies the B6 utilizes to deploy services.
- Understand how to access the B6 from multiple interfaces

### Who should attend?

- Network Operations
- Customer Support

### Prerequisite Training and Skills

- Basic knowledge of Ethernet networking and VLANs

### Training Resources in My Calix

- [Learning Solutions](#)
- [Certifications](#)

## Delivery Mode

This interactive online eLearning course consists of content delivered as video clips, simulations, demonstrations, and other self-paced formats. Learners are prompted to interact with the content as they progress through the course. Calix eLearning courses are often accompanied by voice-over audio. To get the most out of your learning experience, Calix recommends accessing your eLearning course through Chrome or Firefox.

Course Duration: 45 minutes
